Landscape: Greater than One Acre

⌘ Conte & Conte, LLC

Landscape architect John Conte transformed this expanse of grass abutting a dramatic cliff into a lavish formal garden in the English style. The design consists of a succession of "rooms" that reveal themselves to the visitor as the garden unfolds down paths. Focal points guide visitors from one space to the next. The center of the landscape is the boxwood garden with fountain feature; a flourishing rose garden is adjacent. Peggy Deamer appreciates the "impeccable plant choices, with regard to texture, space-making, and scale."
