# Garden Envy

TEN LOCAL LANDSCAPES TO DIE FOR // BY JENNIFER STAHLKRANTZ

6

5

Ever wonder what's blossoming behind those stone walls that line our country roads? We reached out to local landscape designers and asked them to share some of their favorite projects. **CONTE & CONTE LLC'S** design concept for this **(1 & 4)** Armonk property arose from an amalgamation of historical inspirations and created a succession of "rooms" which reveal themselves one by one. **SWEET EARTH CO.** designed **(2)** this Pound Ridge knot garden with a twist—combining the precision and formality of a traditional English knot garden with herbs and natives instead of flowers. The result is casual, functional, and provides a food source for both the client and nearby pollinators. **BENEDEK & TICEHURST** helped a Pound Ridge client achieve early spring color by **(3)** planting tulip bulbs on an island under a grove of river birches. **LOUIS FUSCO LANDSCAPE ARCHITECTS** created this **(5)** modern-meets-rustic Bedford poolscape anchored into a rock ledge and cantilevered off a cliff, allowing swimmers to feel as though they are floating among the treetops. **MARY ADAMS LINES, LLC** transformed **(6)** this former asphalt parking area in Katonah by reorienting the garage entrance and creating this pea stone courtyard centered around a focal point statue. She designed a backdrop of espaliered peach trees and integrated symmetrically placed stewartia pseudocamellia within a sequentially blooming perennial border.
